

Number Stepping Stones

You need a pencil and one coloured pencil.

1 Explore

Count in threes along the row.

Write the missing number on each empty stone.

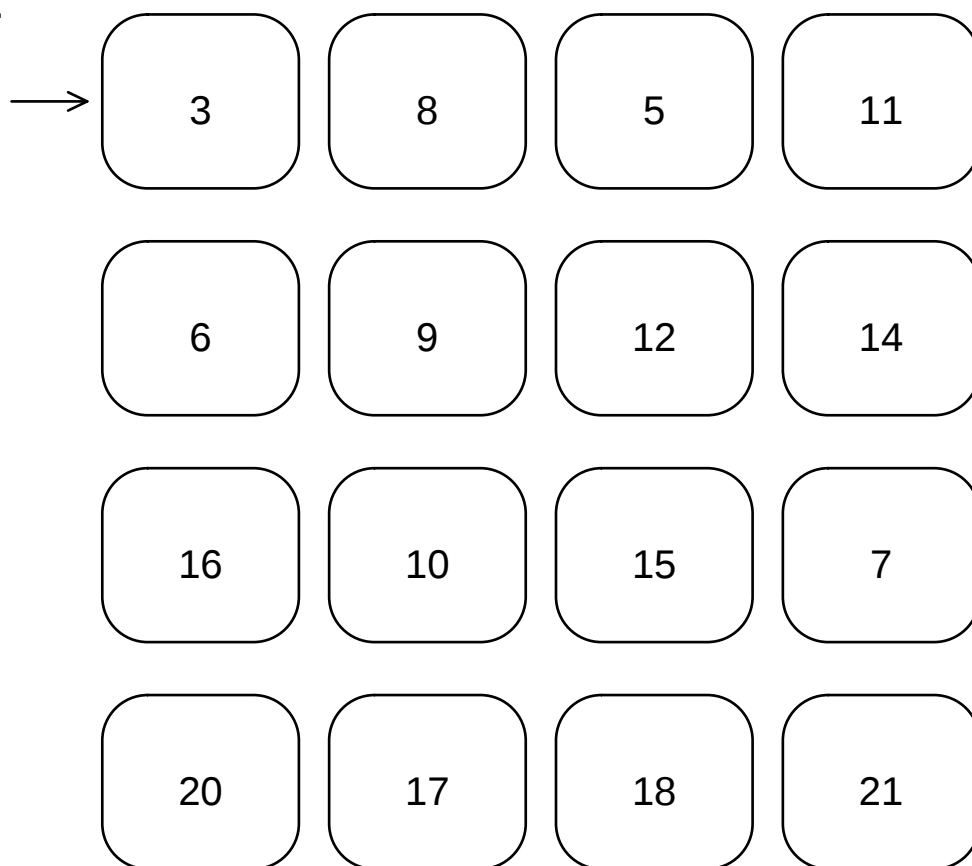

2 Create

Colour every stone in the grid that is a multiple of 3.

The coloured stones make one safe path from START to FINISH.

START

FINISH

3 Explain

Write one sentence: how can you tell 14 is not a multiple of 3?

Make it harder: on the back, draw a 4 by 4 grid of your own where the safe stones are the multiples of 4.
