

Program the Delivery Robot

You need a pencil.

1 Explore

Follow this program from START, one square per arrow.

Circle the square on the grid where the robot stops.

2 Create

Write your own program from START to the parcel.

Draw one arrow in each box. A crate square is blocked.

--	--	--	--	--	--	--	--

3 Explain

Write one sentence: how do you know your program misses every crate?

Make it harder: on the back, draw the same grid with one extra crate.

Write a program that still reaches the parcel.
