

Build a Pond Food Chain

You need a pencil.

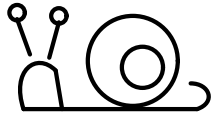

1 Explore

These four living things share one pond.

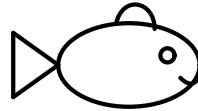

Draw an arrow from each one to the living thing that eats it.

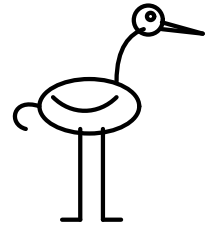

water plant

snail

fish

heron

2 Create

- 1 In the box, draw a food chain of four living things from a garden.
- 2 Label each one, and draw an arrow from each to what eats it.

3 Explain

- 1 Cross out the fish in the pond row above.
- 2 Write what then happens to the snails, and to the herons.

What if?

On the back, add a fifth living thing to your garden chain and redraw the arrows.
